Toward a full arm compatibility

- NativeBoost

- AsmJit-x86

- Machine Code

- NativeBoost

- VirtualCpu

- AsmJit-XXX

- Machine Code

AsmJit-Arm

- Gdb-Arm-Plugin
  - Simulation and debugging purposes
  - Jenkins job
  - Still work to be done on callbacks
- Simple set of instructions
- Focused on Vcpu requirements

Virtual CPU

- Add direct access to register
- New liveness analysis
- New register allocator
- To be done :
    - New compilation process
    - Detection of the current platform
    - Integration with NativeBoost

To be done

- Finish Vcpu

- Change NativeBoost to use Vcpu

- Testing
