what is
serialization ?

serialization

to other technologies

serialization

to similar environments

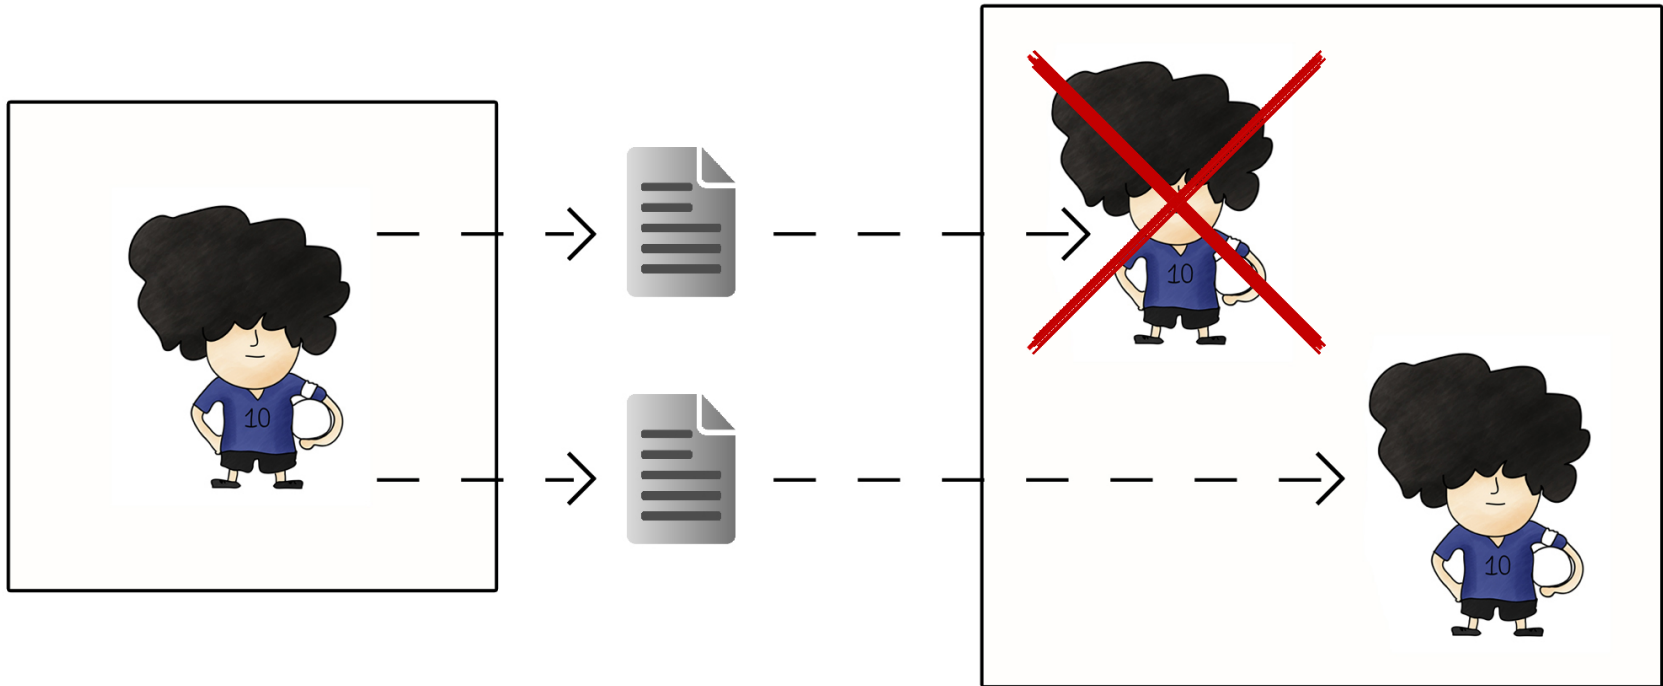

serialization

classes & traits

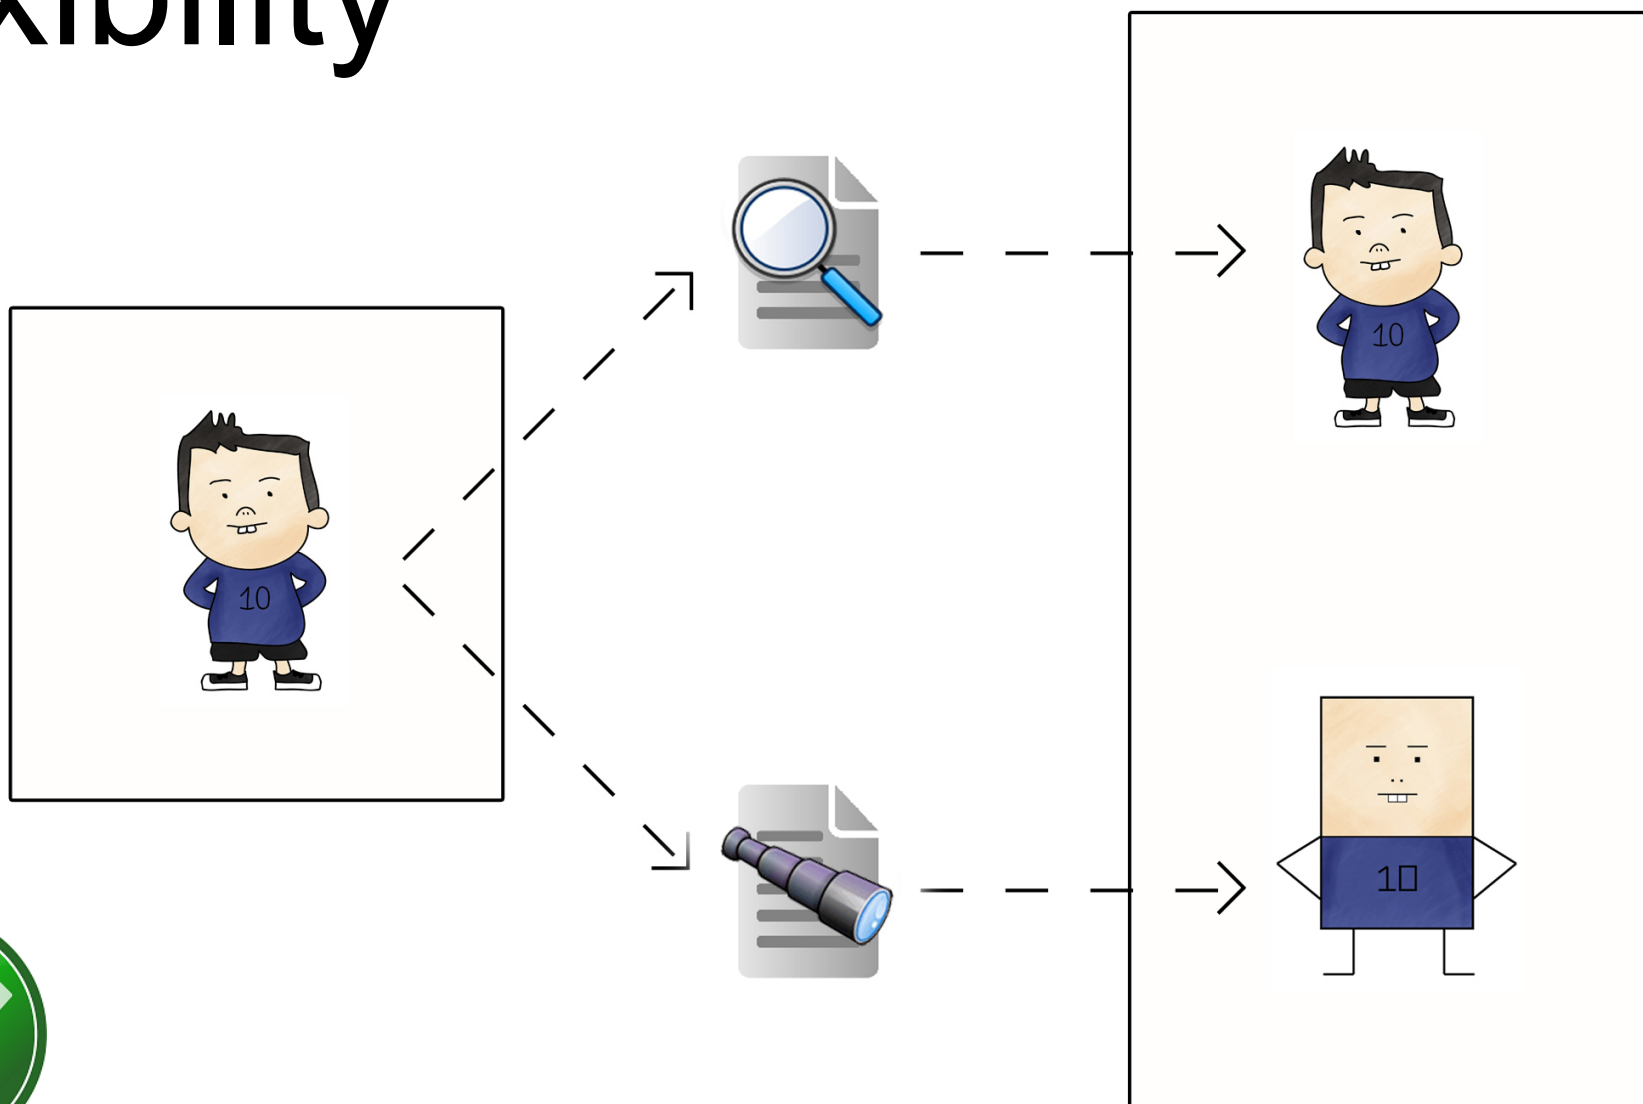

creation vs. reference

environment dependency

flexibility

class changes

how to
serialize ?

format

```
<?xml version="1.0"
<header objects="1"
<body>
  <object class="Pl
    <variable name="
  </object>
  <object class="Co
    <variable name="
  </object>
```

VS.

```
01011101010010
10001010110101
01010010101111
01010010010100
011 0101
```

algorithms

example

algorithms

recursive

player#1																													
		blue				player#2																							
				255				blue		player#3																			
												blue		...															
type		class		type		class		type		int#1		type		class		type		index of blue		type		class		type		index of blue		..	
Obj		Player		Obj		Color		Int		255		Obj		Player		Ref		2		Obj		Player		Ref		2		...	

algorithms

pickling

hr	instances									references						tr
	cluster #1			cluster #2			cluster #3			cluster #1				c #2		
	player#1...4			blue			255			player#1	player#2	...	blue			
# clusters	type class # instances			type class # instances			type # instances int#1			index of player#2 index of blue		index of player#3 index of blue		:	index of 16rFF	root
3	Obj	Player	4	Obj	Color	1	Int	1	255	2	5	3	5	...	6	1

algorithms

special VM-level implementation

what about

fuel?

concrete

flexible

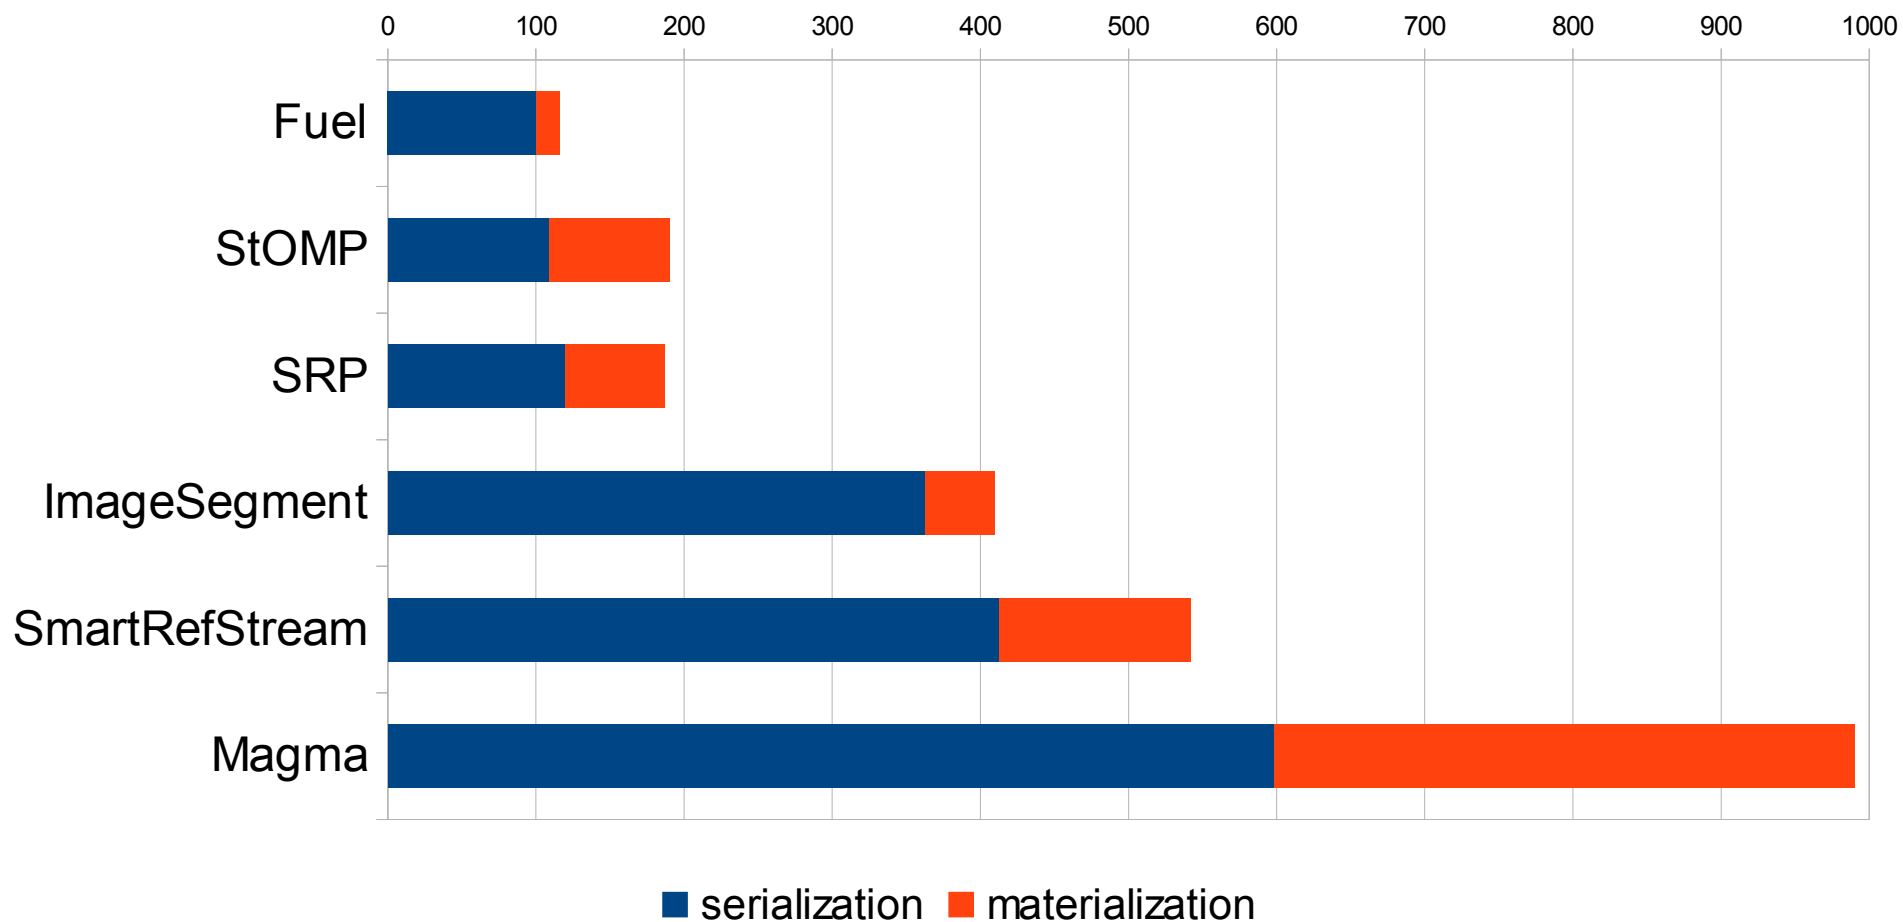

fast

design

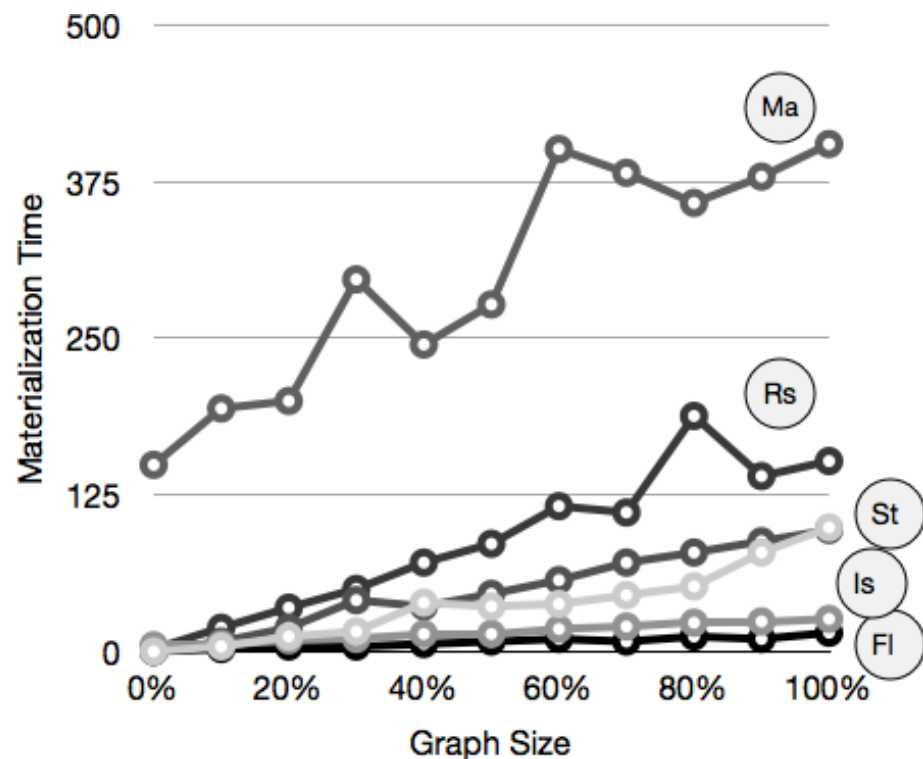

speed

large graphs

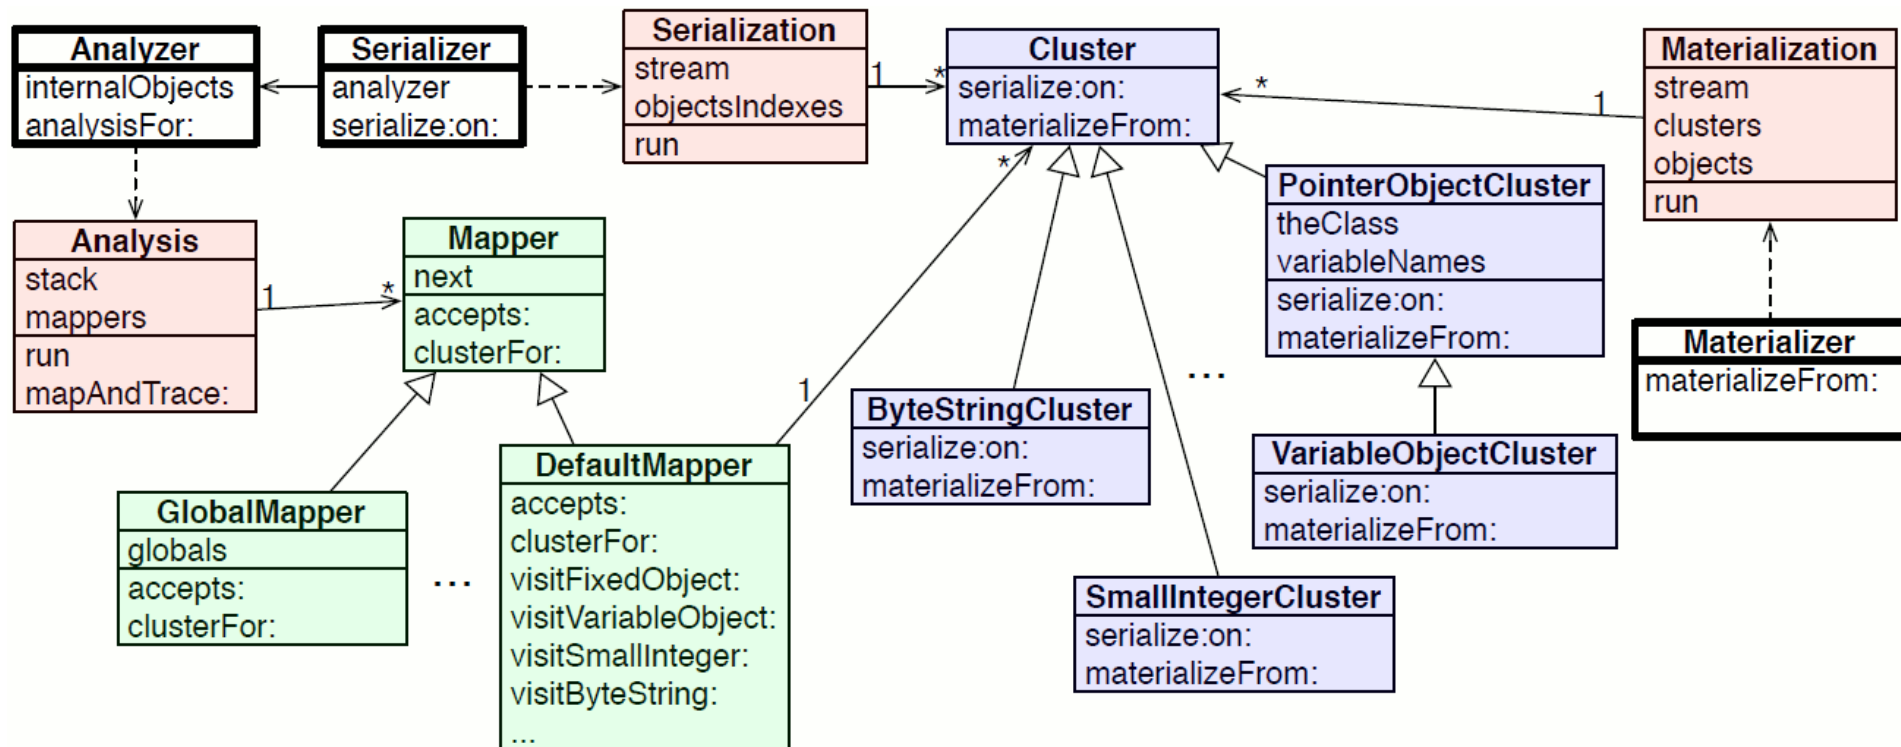

speed

different graph sizes

design

design

1892 lines of code

7.2 methods per class

3.7 lines per method

188 unit tests

90% test coverage

1837 lines of test code

demo

load

seaside 

without compilation!

demo

**revive
your
exceptions!**

future

future
